Abdulmohsen A. Abunohaya Est. For Trading

01/01/2015

AET is proud to offer you a wide range of specialized materials and services to support your engineers or clients in the field.

- ARAMCO VENDOR NUMBER: 10031203
- SABIC VENDOR NUMBER: 506521

- E2S is the world's leading independent manufacturers of high performance audible and visual signals for commercial, industrial, marine, onshore and offshore hazardous locations. Combining the latest technology with engineering expertise we have created the most extensive range of life saving signals that satisfy the toughest global standards.
- our recent big launch... at ADIPEC 2014 - **SIL 2 certified horns and strobes**

- Moflash: Specialists in Visual & Audible Warning Devices for applications in the following markets Industrial, Marine, Process Control, Fire, Explosion Proof, Obstruction Marking, and Automation

- EuroTechFire: Fire Control Panels Manual Call Points; Gas Detectors, Water Leak Detectors etc.

مؤسسة عبد المحسن عبد الله أبو نهية للتجارة

- ExD Cable Adaptors, ExD Cable Glands
- Lightning Rods and Earthing solutions
- Cable Trays and Bus Bars

Spill Containment Pallets

- Secar Cement
- Sodium Tri Poly Phosphate
- Mud Balance

- High, Medium & Low Intensity Obstruction Marking Lights for high rise buildings and towers

مؤسسة عبد المحسن عبد الله أبو نهيبة للتجارة
Abdulmohsen A. Abunohaya Est. For Trading

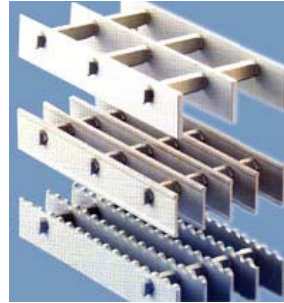

- Safety Ladders; Fall Arrest Systems and Safety Harness

- Lightning Rod and Earthing Solutions, bare copper rod or strip and accessories

- Specialized Safety worker-wear
- Safety Shoes
- Safety Helmets
- Safety Goggles

- **Aluminum grating**
- **Stair Treads**
- **FRP Gratings, Grating Clips,**
- **Hand Rails**
- **Cable Trays**
- **FRP Cable Trays**
- **Aluminum Swaged & Press-Locked Bar Grating**
- **Swage-Locked Rectangular Bar Aluminum Grating**

- Presence Detectors
- Motion Detectors
- Energy Solutions for Temp & Light

- Anti Slip Covers translate into better performance, greater production, and lower costs, regardless of the application - from offshore oil platforms to industrial plants, healthcare facilities and residential areas. Safeguard has a Safety Cover to fulfill your every requirement, offering a range of products, base constructions, colors, grades, and sizes.

- HazMat Responder™ offers the best way to be prepared to control a chemical emergency. It is the anytime/anywhere mobile response solution that enhances the tactical decision-making abilities of chemical emergency response teams. Rather than the traditional methods of providing a "best guess", HazMat Responder™ is always ready to help you make the right decisions before, during and after an incident. The Responder series makes dispersion modeling easier and provides a real-world view of what is or might happen, using available real-time meteorological and gas sensor data.

- Electrical & Electronic Enclosures

Multi Cable Transit - the classic Frame!

- A modular system for the sealing of cables, pipes and bus-bars passing through wall and floor penetrations in buildings, ships and steel constructions.

- The simplest way to seal cables!
Fire Stop Pillows and Sponges are the simplest way to install fire-resistant sealings. Pillows, - consisting of resistant fibre glass filled with intumescent grain, - or Sponges made from a foam rubber-like intumescent material, are put tightly into remaining space of penetration : the sealing is installed!

مؤسسة عبد المحسن عبد الله أبو نهيبة للتجارة
Abdulmohsen A. Abunohaya Est. For Trading

- Similar to Fire Stop Pillows the Fire Stop Sponges can easily be installed by an untrained worker. By pressing the material together, cutting it with a knife or simply tearing it off plugs and blocks can be adapted to every form required. Sealing can be disassembled any time and material may be used again for the renewed sealing.

The Fire Stop Sponges are made from a soft, flexible, sponge-like material with intumescent (heat-expanding) effect. They are especially suitable for the sealing of cables and metal pipes against fire, smoke and sound.

applicable to...

- ...Fire-resistant sealing S30, S90 (F90), gas- and watertight
- ...Building penetration, tight against water pressure
- ...Fire-resistant btb sealing
- ...Sealing in civil defence shelters and explosion areas
- ...Sealing against water pressure, including cable protection pipes

- Safety Showers
- Eye Wash

An inflatable Decontamination Shelter with multi-nozzle shower system.
