AASTRA Telecom

FEATURES PLUS AFFORDABILITY

Building success with the business telephone leader

In today's business world, competition demands that you keep costs down while increasing productivity to be successful. At Aastra Telecom, we like to think that we can help businesses meet the challenge of the new competitive world. Introducing our Model 9116 telephone. Designed to provide all the basic and advanced features needed in a business phone today. With a sleek, simple, compact design, and a price that may surprise you, the Model 9116 offers an ideal solution for your business communication needs. Need to know who is calling while you are on a call? The Model 9116 is compatible with Caller ID and Call Waiting Display with its three line adjustable display. More information is provided via the LED indicator which flashes for message waiting, new call indication, incoming call, extension in use and Hold. In addition, the 80 name and number Callers List provides you with a complete list of incoming callers.

When making calls, the autodialer keys provide up to 15 "one touch" dialer positions for fast and accurate dialing. Or, you can scroll through your own 20 name and number directory to place calls to your special customers or suppliers. Last number redial can save you time when calling a number that was previously busy. And with on-hook dialing, you don't even have to lift the handset to place the call!

Need to have your hands free to take notes during a call? The built in speaker-phone with mute provides flexibility to perform other tasks while on a call.

Compatible with most business telephone systems, the Model 9116 can work in almost any business environment, from the small or home office to larger offices.

The Model 9116 by Aastra Telecom — a smart solution in today's complex business world.
